

Log Search and Analytics

Store and search your log data without limits. Edge Delta Log Search and Analytics provides access to all your data without breaking your budget. Give time back to your engineers with zero maintenance and contextualized views that make troubleshooting easy.

Log data volumes have grown 5x in the past three years. As a byproduct, teams are forced to choose between going over budget or discarding data they might need later while investigating a major incident. Moreover, legacy log management platforms require engineers to spend their time maintaining the platform and updating dashboards instead of building new features.

How Edge Delta Helps

Edge Delta is a new way to do observability. Unlike traditional providers, we process your data as it's created at the source. Make observability costs predictable, surface the most useful insights, and gain total control over your data's shape and location.

REDUCE OBSERVABILITY COSTS

Our distributed architecture and resource-efficient backend enable much lower costs than legacy providers. Leverage the essential features to monitor your applications and troubleshoot issues without exceeding budget.

CONTROL YOUR DATA FOOTPRINT

Transform, enrich, and analyze your data as it's created at the source. Our built-in Observability Pipeline controls enable you to standardize your data format or optimally shape data for your different use cases.

AUTO-DETECT ISSUES, RESOLVE IN MINUTES

Automatically detect issues before they become incidents. With Edge Delta, you gain contextualized views of your log data that help you see every issue and know what changed right away..

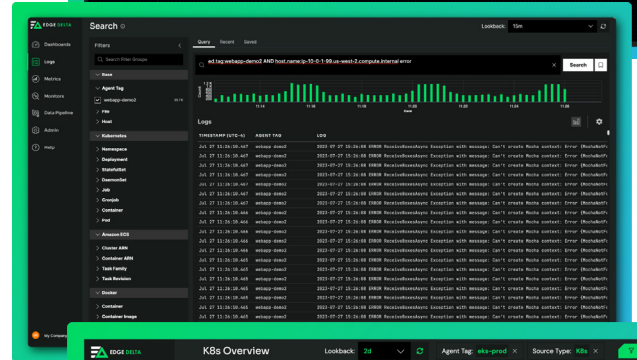

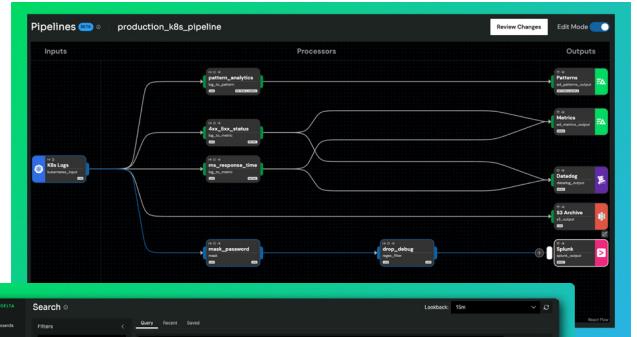

- **30-day retention at no extra cost**
- **SOC 2 Type II certified**
- **Insights in 5 minutes or less**

Our Top Use Cases

Replace Self-Hosted Log Management

Self-hosted log management platforms grow in complexity and cost as your data scales. Replace your system with Edge Delta to stay ahead of data growth forever.

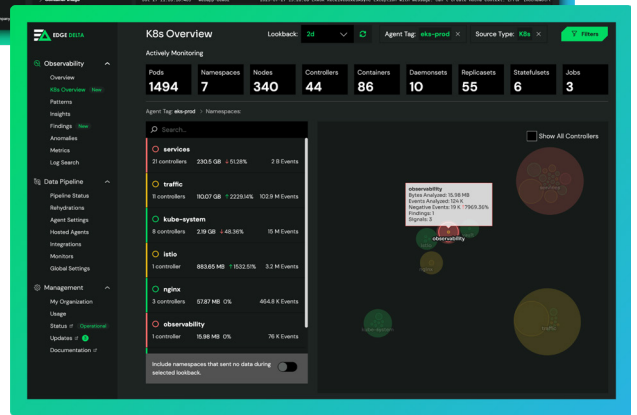

- Reduce TCO by offloading infrastructure costs
- Improve scalability and performance by pushing data processing upstream
- Eliminate the need to perpetually maintain your platform

Expand Log Data Visibility

Optimize spending by complementing your observability suite with Edge Delta. Use Edge Delta to support datasets you can't fit into your existing observability platform – without sacrificing retention or performance.

- Give your team complete access to new datasets
- Avoid paying a premium for non-mission critical data
- Summarize datasets into metrics and stream to your existing platform

Ready to Get Started?

Visit [EdgeDelta.com](https://edgedelta.com) to try Log Search & Analytics – free forever, up to 10GB/day

1. CREATE AN ACCOUNT

Visit edgedelta.com to get started for free.

2. DEPLOY THE AGENT

Run a simple command. You'll be up and running in minutes.

3. SEE RESULTS

That's it! Reap the benefits and we'll handle the rest.
